

Attending an eBLVD Online Meeting requires little effort and no software installation. In most cases, meetings can be viewed from any device that can connect to the Internet.

Access via Email Link

1. Open the email invitation you received from the Meeting Presenter and click the link.
2. If prompted to enter an Access Code, enter the code provided in the email.
3. Follow the simple prompts on the “Join Meeting” page to launch the eBLVD Viewer.
4. If a teleconference number is provided, place the call to access the teleconference.

Access via Web Browser

1. Open a web browser and go to <http://eBLVD.me> or <http://meetings.eblvd.com>
2. Enter the Meeting ID (provided by the Meeting Presenter) and the Access Code, if required.
3. Enter your name and click "Attend Now" to launch the eBLVD Viewer.
4. If a teleconference number is provided, place the call to access the teleconference.

Once connected to the meeting, no further action is required. If the presentation has not yet started, a "Welcome" image will be displayed in the eBLVD Viewer Window. Otherwise, content from the Presenter's desktop will be visible.
